

SANA LAKE RECOVERY CENTER

TREATMENT FACILITY RENOVATION

PROJECT DETAILS

Dittmer, Missouri

Project Value: \$1,400,000

Completion: Spring 2021

- 23,500 SF
- 22 private suites, detox center, offices, recreational space, dining center

Sana Lake opened its recovery center in Dittmer, Missouri in 2019, focusing on acute care and chronic care outpatient services. The 55-acre campus features a treatment facility of short and long-term private suites with views to natural surroundings including a large lake.

The center is the first of its kind in North America, locating multiple services in one building where a full range of services contribute to a comprehensive recovery focus than the typical addiction treatment. The Urgent Access Center provides immediate assistance and intervention to support healthy life choices. The Community Connection Center, also called The Hub, features a community lounge, recreational activity space, coffee bar, meditation areas, and meeting space.

Color Art Construction built the original renovation of Sana Lake, transforming the facility from a religious retreat center to a recovery and wellness program. Recreation spaces and safe, secure areas for comprehensive detox treatment complement the 22 residential suites.

The center has been at or near capacity since its opening. With growing needs to deliver expanded services, the recent facility upgrade features a full renovation of the existing structure. Improvements include updates to the guest rooms, dining center, treatment areas and counseling spaces.
